

Delivering our commitments to you

Distribution Use of System (DUoS) charges workshops

Our Charging Team have held two workshops (11th May, Portsmouth, 25th May, Perth) that focus on the difference between Connection and Distribution Use of System (DUoS) charges. We provided guidance on how you can calculate these charges; this assists you in making an informed decision regarding your connections proposal. To view the presentations please look on the media on our events calendar for these dates.

Provide indicative Distribution Use of System (DUoS) charges in advance upon request

Please contact Angus Rae in our Charging Team who shall provide you with the information you require. angus.rae@sse.com

Provide mapping symbols for the GIS mapping tool

We have uploaded a guide on our website that explains what the different items are on our mapping tool. This can be found at www.ssepd.co.uk/connections/usefuldocuments/ under Network maps dropdown option.

Guidance on revalidation process

Should you wish to request a revalidation of your quotation which extends the acceptance period by a further 90 days then please view our new guidance document on our website www.ssepd.co.uk/Applications/Generation/

Clarify what contestable and non-contestable works are

Just because we own the network doesn't mean you have to accept a quotation from us. There are other companies out there who can carry out many aspects of the work. Competition gives you a choice and keeps us on our game making sure we deliver the best possible service for you. You can view exactly which elements of the connection process are contestable by downloading the 'You have a choice' factsheet at www.ssepd.co.uk/ConnectionsYouHaveaChoice/.
