

COMPETITION IN CONNECTIONS (CIC) INFORMATION PACK

SSEN Connections

Scottish & Southern
Electricity Networks

INFORMATION AVAILABLE TO YOU

SSEN owns and operates the electricity distribution network in the north of Scotland and central southern England. That doesn't mean that SSEN is the only company who can offer connections services in these areas. Competition provides customers with a choice and ensures a healthy competitive market in the Connections space where customers can compare prices and service levels to decide which company is best for them.

This pack has been designed to provide ICPs and IDNOs with useful information available to them via SSEN's website and services.
